

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

What is claimed is:

1. (Original) A method of sharing information between a sender with access to a data network and a recipient's audiovisual display device, the recipient being identified by a voice communication network address and a data communication network address, the method comprising the steps of:

associating the recipient's voice communication network address with the recipient's data communication network address;

establishing a voice connection on a voice communication network between the sender and the recipient;

associating the connection with information to be sent across the data network to the recipient's audiovisual display device based on the established association between the recipient's voice communication network address with the recipient's data communication network address; and

initiating broadcast of the information to the recipient's audiovisual display device.

2. (Original) The method of claim 1 wherein the recipient's reception of the broadcast begins after the recipient authorizes the broadcast.

3. (Original) The method of claim 2 wherein the recipient authorizes the broadcast by remaining on the connection for a designated period of time.

4. (Currently amended) The method of claim 2 wherein the recipient authorizes the broadcast by transmitting a signal across the voice communication network after the voice connection has been established.

5. (Currently amended) The method of claim 2 wherein the recipient authorizes the broadcast by transmitting a signal across the data network after the voice connection has been established.

6. (Original) The method of claim 1 further comprising the steps of:  
receiving input from the recipient or sender;  
changing the information broadcast to the recipient's audiovisual display device based on the input from the recipient or sender.

7. (Original) The method of claim 6 wherein the input is a signal transmitted across the voice communication network.

8. (Original) The method of claim 6 wherein the input is a signal transmitted across the data network.

9. (Original) The method of claim 7 wherein the signal is a DTMF signal.

10. (Original) The method of claim 7 wherein the signal is a voice command.

11. (Original) The method of claim 1 wherein the sender is an automated interactive response system.

12. (Original) The method of claim 1 further comprising the step of ending the broadcast of the information to the recipient's audiovisual display device when the connection between the sender and the recipient ends.

13. (Original) A computer readable medium containing executable program instructions for sharing information between a sender with access to a data network and a recipient's receiving device, the recipient being identified by a

voice communication network address and a data communication network address, the medium comprising:

means for associating the recipient's voice communication network address with the recipient's data communication network address;

means for receiving notification that a voice connection has been established between the recipient and the sender on a voice communication network;

means for receiving from the sender a designation of information associated with the connection; and

means for initiating the broadcast of the information to the recipient's receiving device.

14. (Original) The computer readable medium of claim 13 further comprising means for initiating the connection on the voice communication network.

15. (Currently amended) The computer readable medium of claim 13 wherein the means for initiating the broadcast is initiated by means for sending a signal to a server attached to the data network and capable of broadcasting the information to the recipient's ~~audiovisual display~~ receiving device.

16. (Currently amended) The computer readable medium of claim 13 further comprising means for ending the broadcast of the information to the recipient's ~~audiovisual display~~ receiving device when the voice connection between the sender and the recipient ends.

17. (Canceled)

18. (Canceled)

19. (Currently amended) The method of claim 1~~[[8]]~~ wherein the voice communication network address is a telephone number.

20. (Currently amended) The method of claim 13~~[[8]]~~ wherein the information is adapted for rendering on a television screen.
